## Abstracts

Global Calcium aluminosilicate Market is valued approximately USD XX billion in 2020 and is anticipated to grow with a healthy growth rate of more than XX % over the forecast period 2021-2027. Calcium aluminosilicate (CAS) is naturally occurring silicate clay. It is used in the poultry industry to adsorb the toxins associated with aflatoxin contaminated feed. It is widely used in food and pharmaceutical, also in cosmetics and the fertilizer industry. Strong growth of food and pharma industries and demand from fertilizer and cosmetic industries are driving growth of Calcium aluminosilicate Market. According to Forbes the global beauty industry is a \$532 billion business. The U.S. currently is the world's largest beauty market, with about 20% share, followed by China (13%) and Japan (8%). It projected to grow at 5%-to-7% compound-annual-growth-rate to reach or exceed \$800 billion by 2025. Also, increasing application of calcium aluminosilicate in various end use industries is likely to increase the market growth during the forecast period. However, negative impact of Calcium aluminosilicate due to excessive use impedes the growth of the market over the forecast period of 2021-2027.

The key regions considered for the global Calcium aluminosilicate market study includes Asia Pacific, North America, Europe, Latin America and Rest of the World. Europe is the leading/significant region across the world in terms of market share owing high demand from the food and pharmaceutical industry. Whereas, Asia-Pacific is also anticipated to exhibit highest growth rate / CAGR over the forecast period 2021-2027.

Factors such as rising population and growth in food and beverages industries would create lucrative growth prospects for the Calcium aluminosilicate market across Asia-Pacific region.
