## Abstracts

Global Calcium Channel Blocker Market is valued approximately USD XXX billion in 2021 and is anticipated to grow with a healthy growth rate of more than 5.1% over the forecast period 2022-2029. Calcium channel blockers are a class of drugs that lower blood pressure by stopping calcium from entering heart and artery cells. Stronger cardiac muscle contractions are caused by calcium. Calcium channel blockers facilitate this by allowing blood arteries to relax, which increases the flow of blood and ensures that the heart receives the necessary amount of oxygen. The market growth is driven by significant factors such as increase in cardiovascular diseases and rising demand for Oral Drugs.

Heart failure is a chronic, incapacitating cardio-renal-metabolic condition that affects at least 60 million people globally, according to a news release published by Boehringer Ingelheim GmbH in August 2021. There is an urgent need for novel treatment alternatives as heart failure prevalence rises. Additionally, the market is anticipated to rise due to rising hypertension rates, an increase in hospitals, and government efforts. For instance, the American Hospital Association estimates that there were 6,090 hospitals in the United States as of 2021. According to data updated by the World Health Organization (WHO) in August 2021, more than 700 million people worldwide have untreated hypertension, and as of that year, 1.28 billion people worldwide had hypertension, a sharp increase over the previous few decades. However, lack of skilled professionals' stifles market growth throughout the forecast period of 2022-2029.

The key regions considered for the Global Calcium Channel Blocker Market study includes Asia Pacific, North America, Europe, Latin America, and Rest of the World. North America is expected to hold a major market share owing to increasing prevalence rate of cardiovascular diseases. However, Asia Pacific is expected to be the fastest growing region due to large number of generic manufacturer and developing healthcare facilities.

Major market player included in this report are:

Bausch Health Company Inc.
