Abstracts

Global Calcium Chloride Market is valued approximately at USD XXX billion in 2019 and is anticipated to grow with a healthy growth rate of more than XX % over the forecast period 2020-2026. Calcium chloride, with a chemical formula CaCl_2 , is an inorganic salt that acts as a typical ionic halide. It is colorless crystalline solid at room temperature and is highly soluble in water. It is commercially available in liquid and anhydrous forms. Calcium chloride is hygroscopic generally kept in airtight containers and is used as a drying agent. The end use applications of calcium chloride include dust control & de-icing, gas & oil, contraction, and niche applications such as metallurgical & food processing industries. The market growth is primarily driven by surging demand from oil and gas industry for drilling fluids applications. According to Statista more than 4 billion metric tons of oil is produced worldwide annually of which one-third is produced in middle east region. From 1990 to 2018 Saudi Arabia accounted to 266 billion barrels of oil reserves. The state-owned Saudi Arabian Oil Company continues to identify, expand and enhance its oil production. In 2016 it discovered 2 new oil fields and one new gas field which bring the total to 130 fields which has a production capacity of 12 million barrels per day. Also, the company aims to double its gas production to 23 billion standard cubic feet per day. Furthermore, the growing adoption of calcium chloride as a food preservative in the food industry is also likely to augment the market growth in the coming years. As the European Food and drinks market contributed to be the largest manufacturing sector in 2017 with a turnover of USD 1222 billion. Also, the food and drinks industry accounted to export of 113.5 billion in 2017 which further strengthens the increase in use of calcium chloride during the forecast period. However, excessive

consumption of calcium chloride causes serious ill effects, such as kidney stones, irregular heartbeats, muscle spasms, and joint pains, which impedes the growth of the market over the forecast period of 2020-2026.

The regional analysis of global Calcium Chloride market is considered for the key regions such as Asia Pacific, North America, Europe, Latin America and Rest of the World. North America is the leading/significant region across the world in terms of market share owing to the extreme cold weather conditions which increases the demand for calcium chloride as a de-icing agent. Whereas, Asia-Pacific is also anticipated to exhibit highest growth rate / CAGR over the forecast period 2020-2026. Factors such as rising demand in end-use industries such as food processings would create lucrative growth prospects for the Calcium Chloride market across Asia-Pacific region.
