Global Camshaft Lifter Market is valued at approximately USD xx billion in 2020 and is anticipated to grow with a healthy growth rate of more than xx % over the forecast period 2021-2027. Camshaft Lifters also known as followers or lifters, determine the machining of the lobes of cams; they enable high efficiency while keeping fuel emission low, boosting productivity and increasing number of revolutions per minute. Increasing demand of high-efficiency vehicles is expected to fuel market growth. Government rules and laws for fuel-efficient vehicles are also propelling the market growth. For instance, in 2017, Unites States Environmental Protection Agency and National Highway Traffic Safety Administration applied rules for light trucks and passenger, for increasing fuel efficiency and reduce emissions. However, high expensive service may impede market growth over the forecast period of 2021-2027.
