## Abstracts

Global Cannabidiol (CBD) Market is valued approximately USD XXX billion in 2019 and is anticipated to grow with a healthy growth rate of more than XX % over the forecast period 2020-2027. Cannabidiol (CBD) is a natural botanical concentrate with high amounts of CBD compound,. CBD is the second most common compound after tetrahydrocannabinol (THC) Of the more than 85 cannabinoids so far identified in the cannabis plant. Growth of the market is primarily driven by surging use of cannabidiol in numerous industries including food & Beverage, and pharmaceutical etc. Additionally, growth in number of distribution channels is another major factor propelling the growth of the market. According to company research, the sale of cannabidiol through all distribution channel is anticipated to grow by 45% by year 2024. The CBD offers a wide range of medical applications. These applications fall extensively into three provinces of treatment which include pain management, treatment of complex motor disorders, and mental health care.. However, there is important support in the therapy of certain types of epilepsy for the efficacy of CBD oil. In fact, in June 2018 the U.S. Food and Drug Administration (FDA) approved Epidiolex, a drug designed through CBD for the treatment of seizures associated with two rare and severe forms of epilepsy in patients 2 years of age and older. Moreover, surging use of cannabidiol in pharmaceutical sector due to its benefits is further propelling the growth of the market. CBD is frequently used to treat anxiety, and for patients dealing with insomnia, studies suggest that CBD may help with both falling asleep and staying asleep. However, several side effects associated with the consumption of cannabidiol such as nausea, fatigue and irritability are expected to hamper the market growth over the forecast period of 2020-2027.

The regional analysis of global Cannabidiol (CBD) market is considered for the key regions such as Asia Pacific, North America, Europe, Latin America and Rest of the World. North America is the leading/significant region across the world in terms of market share owing to the growing number of manufacturers and growing application in pharmaceutical. Whereas, Asia-Pacific is also anticipated to exhibit highest growth rate / CAGR over the forecast period 2020-2027. Factors such as rising disposable income and rising investment for the pharmaceutical development would create lucrative growth prospects for the Cannabidiol (CBD) market across Asia-Pacific region.
