Abstracts

Global Canopy Market is valued approximately USD 1.73 billion in 2020 and is anticipated to grow with a healthy growth rate of more than 4.0 % over the forecast period 2021-2027. Canopies are the roof structures or shades, that are made of metal, wood, or glass, which are particularly used to provide shelter to the open areas as such. These can be used in various forms such as organizing events, keeping the places dry, protecting the outer areas from direct sunlight and widening the living or working open spaces. increasing trend towards beautification, increased use in the automotive sector and increasing demand in the residential and non-residential purposes has led the adoption of Canopy across the forecast period. For instance, according to Statista, the wholesale sales of canopies in the U.S. went up from \$ 326.9 million US to \$401.9 million US in the year 2020 and is expected to grow at a constant rate in the near future as well. However, huge installation and maintenance cost impedes the growth of the market over the forecast period of 2021-2027. Also, with the increase in the international trade and transportation of goods is likely to increase the growth of the market in the forecasting period

The regional analysis of global Canopy market when considering for various key regions such as Asia Pacific, North America, Europe, Latin America and Rest of the World has led to the analysis that North America is a significant region across the world in terms of market share owing to increasing growth of the industrial sector and increasing shift in

the mobility homes. Whereas, Asia-Pacific is also anticipated to exhibit the highest growth rate over the forecast period 2021-2027. Factors such as increasing demand from the non-residential sector coupled with probing demand in the food and beverages industry such as hotels, restaurants and other food outlets would create lucrative growth prospects for the Canopy market across Asia-Pacific region.
