## **Abstracts**

The Global Caprylyl Glycol Market is valued at approximately USD 1.59 billion in 2023 and is anticipated to grow with a healthy growth rate of more than 6.6% over the forecast period 2024-2032. Caprylyl glycol, also known as 1,2-octanediol, is rapidly gaining traction across diverse industries due to its valuable properties. The increasing adoption of this compound in personal care products, cosmetics, and pharmaceuticals is set to significantly boost sales growth. The radiance and success of the cosmetics and personal care industry have proved hard to resist, attracting new companies and investors. To stand out from the crowd, brands are making different choices, including using natural ingredients like 1,2-octanediol. This chemical is gaining immense popularity as a humectant and preservative in the cosmetics and personal care sector. The increasing usage of this hydration powerhouse in masks, moisturizers, and other products designed to keep skin hydrated will likely fuel demand through 2032.

The global Caprylyl Glycol industry is projected to advance rapidly during the forecast period due to multiple factors. One such key factor is the increasing adoption of 1,2-octanediol in the cosmetics and personal care sector. Caprylyl glycol has emerged as an ideal moisturizer, humectant, and antimicrobial agent in various skincare and haircare items. Thus, the rapid growth of the global cosmetics and personal care industry will play a key role in uplifting demand for caprylyl glycol through 2034.

People across the world are becoming more conscious of personal hygiene and grooming, leading to increased spending on cosmetic and personal care products. This creates growth prospects for the caprylyl glycol sector worldwide. Today, consumers are prioritizing skincare and personal grooming, leading to surging demand for moisturizers, lotions, creams, and shampoos containing 1,2-octanediol. High production and consumption of these products will have a positive impact on market growth.

Naturalism is gaining momentum in the beauty sector, compelling brands to opt for natural and eco-friendly ingredients. This will play a key role in boosting the growth of the caprylyl glycol market during the assessment period. Despite the growing popularity of 1,2-octanediol, there are certain factors that limit its demand and usage. These include the availability of alternatives like propylene glycol and stringent regulations on the cosmetics and personal care industry. Ingredients like propylene glycol are giving tough competition to 1,2-octanediol. These substitutes are widely used in various industries as solvents and humectants, which negatively impacts the target sector.

The key regions considered for the Global Caprylyl Glycol Market study include Asia Pacific, North America, Europe, Latin America, and Rest of the World. North America is a dominating region in the Caprylyl Glycol Market in terms of revenue. Key factors supporting the growth of the Caprylyl Glycol market in North America include rising demand for personal care and cosmetic products, increasing consumer awareness about skincare benefits, growing applications in pharmaceuticals, and favourable regulatory policies.
