Abstracts

Global Carboprost Tromethamine Market is valued at approximately USD XXX billion in 2021 and is anticipated to grow with a healthy growth rate of more than XX % over the forecast period 2022-2028. Carboprost is an oxytocic prostaglandin that is synthesised. Hemabate, also known as carboprost tromethamine, is a kind of prostaglandin used to treat excessive bleeding after childbirth in women and postpartum haemorrhage. It's also used as a contraceptive pill to induce abortion by producing uterine contractions and progressive placental evacuation. The increase in the cases of postpartum haemorrhage dramatically and enhanced consciousness have led to the adoption of Carboprost Tromethamine across the forecast period. For Instance: as per the March of Dimes in 2020, Postpartum haemorrhage (PPH) usually occurs within one day of delivery, however, it can occur up to 12 weeks later. PPH affects 1 to 5 out of every 100 women who give birth (1 to 5%). During vaginal birth, women lose about half a quart (500 millilitres), and following a caesarean birth (also called c-section), they lose about a quart (1,000 millilitres). Also, the larger clientele and rising prescription rates for novel medicine are likely to increase the market growth during the forecast period. However, side effects of Carboprost Tromethamine Administration impede the growth of the market over the forecast period of 2022-2028.

The key regions considered for the global Carboprost Tromethamine market study include Asia Pacific, North America, Europe, Latin America and Rest of the World. North America is the leading region across the world in terms of market share owing to the growing cases of postpartum haemorrhage coupled with an enhanced consciousness

among public. Whereas, Asia-Pacific is also anticipated to exhibit the highest growth rate over the forecast period 2022-2028. Factors such as larger clientele and rising prescription rates for novel medicine would create lucrative growth prospects for the Carboprost Tromethamine market across Asia-Pacific region.
