Global Cardiac Safety Services Market is valued approximately USD 442 Million in 2019 and is anticipated to grow with a healthy growth rate of more than 11.20% over the forecast period 2020-2027. Cardiac safety services offerings can be described as services that address assisting and designing medical trials and different research required for the monitoring of cardiac protection. The cardiac safety services include non-invasive cardiac imaging, ambulatory blood pressure monitoring, physiologic stress testing, platelet aggregation and other services, along with the QT studies. The essential offering of cardiac safety services in treatment of cardiovascular diseases along with global rise in cases of cardiovascular diseases is the factor propelling the growth of market over the forecast years. For instance: As per World Health Organization 2017, Cardiovascular diseases is the leading cause of death across the world, accounting for 17.9 million deaths per year in 2017 and expected to grow over 23.6 million by 2030. In addition, growing R&D expenditure in the pharmaceutical & biopharmaceutical industry is the factor propelling the growth of market over the forecast years. However, high cost associated with cardiac safety evaluation is the factor hampering the market growth.

The regional analysis of global Cardiac Safety Services Market is considered for the key regions such as Asia Pacific, North America, Europe, Latin America, and Rest of the World. North America is the leading/significant region across the world in terms of market share owing to the rise in R&D expenditure in the pharmaceutical & Biopharmaceutical industry.
