Abstracts

Global Cardiovascular Devices Market is valued at approximately USD 43 billion in 2019 and is anticipated to grow with a healthy growth rate of more than 7% over the forecast period 2020-2027. Cardiovascular diseases (CVDs) is the major cause of mortality and morbidity all over the world. The CVDs are the diseases associated with the heart and blood vessels and include coronary heart disease, rheumatic heart disease, cerebrovascular disease, and other heart conditions. Some of the main factors that lead to the prevalence of cardiovascular disease are the consumption of tobacco, physical inactivity, and unhealthy diet, which can raise the risk of heart attacks and strokes. While, the high blood pressure, increased level of cholesterol levels, and diabetes are also causing cardiovascular diseases. Therefore, the demand for cardiovascular devices is significantly rising as they are extensively used to treat and diagnose several heart diseases and associated health complications. Furthermore, the rising cases of cardiovascular diseases among people, along with escalating demand for minimally invasive surgeries are the few factors responsible for the CAGR of the market during the forecast period. For instance, according to the American Heart Association, the occurred of death due to cardiovascular diseases was about 17.6 million in 2016, and a number is expected to grow to over 23.6 million by 2030. Also, as per the Center for Disease Control and Prevention (CDC), about 610,000 die due to heart diseases in the United States every year. This, in turn, is expected to promote the

demand for cardiovascular devices globally. Moreover, the recent outbreak of COVID-19 pandemic around the world has led to a rise in demand for cardiovascular devices and other essential medical supplies to prevent the spread of this pandemic and provide optimum care to the patient, which is further promoting the market growth in the forthcoming years. However, the high deployment & maintenance costs and stringent government regulations for product approval are the few factors impeding the market growth over the forecast period of 2020-2027.

The regional analysis of the global Cardiovascular Devices market is considered for the key regions such as Asia Pacific, North America, Europe, Latin America, and Rest of the World. North America is the leading/significant region across the world in terms of market share owing to the high adoption of sophisticated surgical treatments, rising prevalence of CVDs, and the presence of a significant number of medical device manufacturers in the region. Whereas, Asia-Pacific is anticipated to exhibit the highest growth rate / CAGR over the forecast period 2020-2027. Factors such as sedentary lifestyles and unhealthy dietary habits, rising elderly population, and increasing incidences of cardiac arrest among people would create lucrative growth prospects for the Cardiovascular Devices market across the Asia-Pacific region.
