Abstracts

Global Care Services Market is valued at approximately USD XX million in 2021 and is anticipated to grow with a healthy growth rate of more than XX% over the forecast period 2022-2028. Care services are a service for the prevention, diagnosis, treatment, or relief of a mental, physical, or behavioral health condition, injury, illness, or disease. Care services provide assistance with the activities of daily living. The growing geriatric population, rising incidences of chronic health diseases, coupled with the increasing reimbursement benefits offered in-home care services in developed nations are some prominent factors soaring the market growth across the globe. For instance, as per the World Health Organization (WHO), the global geriatric population was evaluated to be more than 524 million in 2010 and it is expected to rise by 2 billion by the year 2050. Consequentially, the growing aging population is fueling the demand for care services, which accelerates the growth of the market. However, the high cost of services and dearth of home care professionals in developing regions hamper the market growth over the forecast period of 2022-2028. Also, the rising inclination toward value-based care services and the availability of advanced technology and tools to improve patient access to care are anticipated to act as catalyzing factors for the market demand during the forthcoming scenario.

The key regions considered for the global Care Services Market study include Asia Pacific, North America, Europe, Latin America, and the Rest of the World. North America is the leading region across the world in terms of market share owing to the growing expenditure on healthcare, along with rising adoption of emerging technology-

based care services like app-based teleconsultation. Whereas, Asia-Pacific is anticipated to exhibit the highest CAGR over the forecast period 2022-2028. Factors such as the rising frequency of chronic diseases among population, as well as, rapidly increasing geriatric population, would create lucrative growth prospects for the Care Services Market across the Asia-Pacific region.
