Abstracts

Global Carrier Containers Market is valued approximately at USD xx billion in 2020 and is anticipated to grow with a healthy growth rate of more than xx% over the forecast period 2021-2027. Carrier Containers are used for the carriage and transportation of goods via sea and land. The global Carrier Containers market is driven by increasing seaborne trade across the globe. According to the United Nations Conference on Trade and Development, the goods loaded worldwide through sea has been increasing significantly from 10.3 billion tons in 2016 to 11.1 billion tons in 2019. Another driving factor for the market growth is increase in carrier services for promoting international trade. For instance, in August 2021, OOCL introduced a new rail-sea multimodal container service between China to the east coast of the US. Furthermore, rising demand for consumer & industrial goods, expansion of durable packaging sector, growing international trade between the countries, and favorable government initiatives to support rising production of goods are expected to create opportunity for Carrier Containers market growth over the forecast period. However, trade conflicts between countries hampers the growth of the market over the forecast period of 2021-2027.

The major regions such as Asia Pacific, North America, Europe, Latin America, and the Rest of the World are considered for the geographical analysis of global Carrier Containers market.
