Abstracts

Global Cash Logistics Market is valued at approximately USDXX million in 2021 and is anticipated to grow with a healthy growth rate of more than XX% over the forecast period 2022-2028. Cash logistics is defined as the physical movement and handling of cash across various locations. It chiefly transports, manages, and protects the funds by eradicating the risks & public exposure. The locations encompass ATM points, cash centers & bank branches, large retailers, and other premises. The flourishing development in the circulation of cash, growing deployment of ATMs, coupled with the surging demand for safe & vaults for cash management are the several factors excelling the market's global demand. For instance, according to the World Bank, in 2018, the total number of automated teller machines (ATMs) accounted for 39.41 for every 100,000 adults. Also, it is estimated that the figure rises and reached 41.24 machines for every 100,000 adults. Therefore, the rising installation of ATMs is fueling the demand for cash logistics, which is presenting lucrative growth of the market across the globe. However, the increasing adoption of digital money and rising incidences of cash-in-transit vehicle robberies impede the growth of the market over the forecast period of 2022-2028. Also, an increase in cash demand and growth of the emerging economies are anticipated to act as catalyzing factors for the market demand during the forecast period.

The key regions considered for the global Cash Logistics Market study include Asia Pacific, North America, Europe, Latin America, and the Rest of the World. North America is the leading region across the world in terms of market share owing to the

growing circulation of cash in major economies like the United States and Canada. Whereas, Asia-Pacific is anticipated to exhibit the highest CAGR over the forecast period 2022-2028. Factors such as the availability of advanced banking facilities, as well as rising installation of ATMs, would create lucrative growth prospects for the Cash Logistics Market across the Asia-Pacific region.
