## **Abstracts**

Global Cashew Kernel Market is valued approximately at USD XX billion in 2021 and is anticipated to grow with a healthy growth rate of more than XX% over the forecast period 2022-2029. Cashews are high in fibre, that helps with weight growth by enhancing digestive function. The growing popularity of bone-healthy cashew snacks includes a significant increase in the use of edible cashew kernels as one of the main ingredients in desserts and cooking, particularly in Asian cuisine. They are also a key ingredient in products like muesli, energy bars, cookies, chocolate, and ice cream. The Cashew Kernel market is expanding because of factors such as growing usage of edible cashew kernels and rising number of processing units in African countries.

According to the Global Cashew Council, Cote D'Ivoire produced the rawest cashew nuts (RCN) in 2020–2021, accounting for 900,000 metric tons. India stood second with 691,000 tons, followed by Vietnam with 450,000 tons, Nigeria with 260,000 tons, Cambodia with 190,000 tons, and many more. In addition, research in the British Journal of Nutrition found that persons who eat nuts more than four times per week have a 37% lower risk of coronary heart disease. As a result, rising production and awareness about the nutritional value of the nuts is favoring the market growth. Furthermore, Successful implementation of initiatives in cashew production is creating a lucrative opportunity to the market. However, the high cost of Cashew Kernel stifles market growth throughout the forecast period of 2022-2029.

The key regions considered for the Global Cashew Kernel Market study includes Asia Pacific, North America, Europe, Latin America, and Rest of the World. Asia Pacific
