Abstracts

Global Casting and Splinting Market is valued at approximately USD XX million in 2021 and is anticipated to grow with a healthy growth rate of more than XX% over the forecast period 2022-2028. Casts and splints are orthopedic devices that are adapted for supporting and protecting injured or fractured bones & joints, ligaments, tendons, and other tissues. This helps in reducing the pain and swelling and keeps the bone in place until it completely recovered. Factors such as the increasing incidences of roadside accidents, rising prevalence of orthopedic, sports, and musculoskeletal injuries, coupled with the growing occurrence of age-related orthopedic illnesses are impelling the market demand across the globe. For instance, according to the World Health Organization (WHO), globally, 9.6% of men and 18% of women aged over 60 have symptomatic osteoarthritis. In which, 80% are restricted to move and 25% are not able to perform daily activities. Consequentially, the growing frequency of orthopedic disorders is augmenting the market growth in the impending years. However, rising threats of pressure sores or syndrome and the high prices of equipment impede the growth of the market over the forecast period of 2022-2028. Also, the rising advancement in casting and splinting materials and increasing technological developments are anticipated to act as catalyzing factors for the market demand during the forecast period.

The key regions considered for the global Casting and Splinting Market study include Asia Pacific, North America, Europe, Latin America, and the Rest of the World. Asia Pacific is the leading region across the world in terms of market share owing to the high incidences of orthopedic injuries and road accidents, along with growing population. Whereas, North America is anticipated to exhibit a significant growth rate over the forecast period 2022-2028. Factors such as the availability of favorable reimbursement policies, and increasing toll of musculoskeletal injuries and fractures, would create lucrative growth prospects for the Casting and Splinting Market across the North American region.
