## **Abstracts**

Global Catalog Management System Market to reach USD 1460.2 million by 2025.

Global Catalog Management System Market valued approximately USD 761 million in 2016 is anticipated to grow with a healthy growth rate of more than 7.51% over the forecast period 2018-2025. Improvement in information technology systems that fulfill customers' requirements and increasing use of the internet for business are driving the growth in the Global Catalog Management System Market. However, the risk associated with data security and lack of awareness about the utilities and benefits of catalog management systems hinder the growth in the market. A catalog management system is used to edit online catalogs, thus enables suppliers to price the goods available. It is a process that helps suppliers to quickly modify the changes in product and price, and introduce new items. The catalog management software allows consumers to manage the record of suppliers, their contact details, and other information about products and services. These consumers include sectors like healthcare, software and services, banking, financial services and Information Technology (IT) and telecom. Catalogs play an important role in any business, as they provide the list of products details, information about the items available and delivery status. Catalog management provides a solution for companies to incorporate data into a single digital marketplace for all suppliers, customers, processes, and policies. Besides this, Catalog management software reduces production time, offers accurate

catalogs, and increases sales by allowing customers to store all their product data in a single system and transform catalogs in multiple formats.

The regional analysis of Global Catalog Management System Market is considered for the key regions such as Asia Pacific, North America, Europe, Latin America and Rest of the World. North America is the leading/significant region across the world in terms of market share. Whereas, owing to the countries such as China, Japan, and India, Asia Pacific region is anticipated to exhibit higher growth rate / CAGR over the forecast period 2018-2025.
