Abstracts

Global Catamaran Market is valued approximately USD XX billion in 2021 and is anticipated to grow with a healthy growth rate of more than XX% over the forecast period 2022-2028.

The expansion of the sector is fueled by a variety of factors, including rising cruising and racing events and rising disposable money among the populace. Catamarans offer excellent comfort. They have a lot more space than monohulls, thus the cockpit and living area between the two hulls are spacious enough. Due to booming marine tourism and consumer preference for opulent travel, the market is growing at an incredible rate. Catamarans that are faster and more fuel-efficient are being produced by boat manufacturers as a result of design and technological developments. As a result, many loyal monohull owners have shifted to a catamaran. In November 2021, The Martini 7.0, a 165-foot catamaran boat with innovative technology that treats seasickness, was unveiled by Servo Yachts LLC. However, the fact that catamarans have two engines and two rudders increases costs, which has a detrimental effect on the market growth for catamarans.

The key regions considered for the global Catamaran Market study include Asia Pacific, North America, Europe, Latin America, and the Rest of the World. Europe is the leading region over the globe. The adoption of technologically advanced catamarans and the growing number of High-Net-Worth Individuals (HNWI) are the main factors propelling regional catamaran sales growth in Europe. The North America is the growing with the fastest CAGR across the world in terms of market share due to consumers in the area

are spending a lot of money on outdoor recreational pursuits including boating, fishing, and cruises. The popularity of several watersports, including kayaking, rafting, and canoeing, is driving a growth in demand for recreational watercraft in the area. The Outdoor Industry Association 2020 claims that the outdoor recreation industry increased market size by USD 887 billion in annual consumer spending, USD 7.6 million in employment, and USD 125 billion in annual federal, state, and local tax revenues.
