## **Abstracts**

Global Caulking Gun Market is valued approximately USD XX million in 2021 and is anticipated to grow with a healthy growth rate of more than XX % over the forecast period 2022-2028. The Caulking Gun can be defined as devices that utilized to use caulk, a type of sealant, effectively. Caulk is a substance used to seal and adhere, such as closing a gap or crack between a window frame and jamb, or a sink and a vanity. Different space can be sealed using caulk and a caulk gun. The rising demand for adhesives and sealants worldwide and increasing end use applications of Caulking Gun are factors that are accelerating the global market demand. For instance, according to Statista – In 2020, the global market for adhesives, sealants, and application equipment was estimated at USD 89 billion, and this amount is estimated to grow to USD 114 billion by end of 2022. Furthermore, companies are coming with new products to leverages increasing demand for Caulking guns. For instance, in May 2019, Irion-America, LLC launched its new “eXcePt” series product line comprised of ‘drip control’ caulking and sausage guns. This new drip control technology facilitates no dripage, mess or waste. Also, growing demand for DIY-based activities in home interiors and increasing investment towards infrastructure development in emerging markets are

anticipated to act as a catalyzing factor for the market demand during the forecast period. However, a lack of demand & awareness from emerging economies impedes the growth of the market over the forecast period of 2022-2028.

The key regions considered for the global Caulking Gun Market study include Asia Pacific, North America, Europe, Latin America, and the Rest of the World. North America is the leading region across the world in terms of market share owing to the growing commercial construction and presence of leading market players in the region.
