Global CDU Heat Exchanger Antifoulants Market is valued approximately USD XX million in 2021 and is anticipated to grow with a healthy growth rate of more than XX % over the forecast period 2022-2028. The CDU Heat Exchanger Antifoulants also known as antifoulants coating can be defined as chemical substance utilized to prevent and eliminate fouling layers of corrosion deposits in heat exchangers used during crude oil distillation. The application of antifoulants reduce maintenance and repair costs of heat exchangers and extend their life span. The rising petrochemicals demand worldwide and increasing number of crude distillation units as well as recent product launches from leading market players are factors that are accelerating the global market demand. For instance, according to Statista – in 2021, the worldwide demand for gasoline was estimated at 23.8 million barrels per day, and the demand is projected to grow to 29 million barrels per day by 2025. Furthermore, leading market players are coming up with new products to leverage the increasing demand for CDU Heat exchanger Antifoulants. For instance, in September 2021, Pittsburgh, USA based coatings company PPG recently announced the launch of a new antifoulant coating named PPG Sigma Sailadvance NX. Also, growing investment towards refinery projects and surging advancements in petrochemicals industry are anticipated to act as a catalyzing factor for the market demand during the forecast period. However, a growing utilization of fuel additives and stringent government regulations impede the growth of the market over the forecast period of 2022-2028.

The key regions considered for the global CDU Heat Exchanger Antifoulants Market study include Asia Pacific, North America, Europe, Latin America, and the Rest of the

World. North America is the leading region across the world in terms of market share owing to the growing number of crude oil exploration projects and presence of leading market players in the region. Whereas, Asia Pacific is anticipated to exhibit a significant growth rate over the forecast period 2022-2028.
