Abstracts

Global Cell-based Assay Market is valued approximately USD 13.10 billion in 2018 and is anticipated to grow with a healthy growth rate of more than 6.30% over the forecast period 2019-2026. Cell based assay refers to a technique of analysis of living cell on the basis of various parameters. In cell-based assays, functional cells are used as diagnostic tools in research for new drugs. Also, cell-based assays help to measure cell motility, proliferations and facilitate research in the area of stem cells, immunology, cancer and others. Further, rising prevalence of chronic diseases and lifestyle disorders and rising adoption of high-throughput screening methods have led to the adoption of Cell-based Assay across the forecast period. According to fight chronic disease organization in 2015, in US 133 million deaths are caused and disability due to chronic diseases. It is estimated that 45% Americans populations are suffering from at least one chronic disease. Also, with the increasing investments in research and development for drug discovery, the adoption & demand for Cell-based Assay is likely to increase. However, high maintenance and operational costs impedes the growth of the market over the forecast period of 2019-2026.

The regional analysis of global Cell-based Assay market is considered for the key

regions such as Asia Pacific, North America, Europe, Latin America and Rest of the World. North America is the leading/significant region across the world in terms of market share owing to the well-established healthcare sector along with the high adoption of cell-based therapies. Whereas, Asia-Pacific is also anticipated to exhibit highest growth rate / CAGR over the forecast period 2019-2026. Factors such as technological advancement, rise in investments in R&D includes life science research and drug discover outsourcing would create lucrative growth prospects for the Cell-based Assay market across Asia-Pacific region.
