Global Central Fill Pharmacy Automation Market is valued approximately at USD XX billion in 2022 and is anticipated to grow with a healthy growth rate of more than 11.2% over the forecast period 2023-2030. A 'central fill pharmacy' is a pharmacy authorized by its state of residence to prepare controlled substance orders based on valid prescriptions received from a registered retail pharmacy. The central fill pharmacy then sends the labeled and filled prescription back to the retail pharmacy, which delivers it to the end consumer. The market is driven by key factors such as surging incidence of chronic diseases and increasing demand for specialty drug prescriptions.
