Abstracts

Global Ceramic Fiber Market is valued approximately USD 1.8 billion in 2018 and is anticipated to grow with a healthy growth rate of more than 9.8% over the forecast period 2019-2026. Ceramic fiber is lightweight insulating product that has low thermal mass and low thermal conductivity made by alumino-silicate materials. These ceramic fibers are used in wide range of industrial commercial applications owing to its high-temperature stability, low thermal conductivity, low heat storage and high thermal shock resistance. The growth of the market is primarily driven by the increasing demand for less toxic solutions by end use industries. Furthermore, increasing demand for high thermal efficiency are further contributing towards market growth. However, stringent regulations pertaining to the sue of carcinogenic materials impedes the growth of the market over the forecast period of 2019-2026.

The regional analysis of global Ceramic Fiber market is considered for the key regions such as Asia Pacific, North America, Europe, Latin America and Rest of the World. North America is expected to witness steady growth across the world in terms of market share owing to rise in shale gas exploration coupled with growing demand of ceramic fiber from iron& steel and petrochemical industries. Whereas, Asia-Pacific is also anticipated to exhibit highest growth rate / CAGR over the forecast period 2019-2026. Factors such as rapid industrialization, growing crude steel production and increasing

awareness about environmental protection would create lucrative growth prospects for the Ceramic Fiber market across Asia-Pacific region.
