Abstracts

Global Certificate Authority Market is valued approximately USD 119.48 Million in 2021 and is anticipated to grow with a healthy growth rate of more than 12.3% over the forecast period 2022-2028. The certified authority is an entity that issues digital certificates. A digital certificate endorses the ownership of a public key by the labeled theme of the certificate. Digital certificates add encryption for assuring website protection. The rising number of stringent regulatory standards and data privacy compliances, increasing incidences of HTTPS phishing attacks, growing concerns pertaining to loss of critical data, coupled with the surging adoption of cloud-based and virtualization technologies are the primary factors that are projected to boost the Market demand around the world. For instance, in April 2021, DigiCert launched the company's new DigiCert Automation Manager- a containerized enterprise solution for on-premises, high-volume TLS certificate automation. However, a lack of awareness among organizations about the significance of SSL certificates is a major challenge before the Market growth. Also, the exponential rise in the adoption of IoT trends across industry verticals is anticipated to act as a catalyzing factor for the Market demand during the forecast period.

The key regions considered for the Global Certificate Authority Market study include Asia Pacific, North America, Europe, Latin America, and the Rest of the World. North America is the leading region across the world in terms of Market share owing to the execution of stringent data security regulations and compliance and the significant presence of primary certificate authorities. Whereas, Asia-Pacific is also anticipated to exhibit the highest CAGR over the forecast period 2022-2028. Factors such as rapid digital transformation, an increasing number of online businesses, as well as increased proliferation of the internet of things (IoT), would create lucrative growth prospects for the Certificate Authority Market across the Asia-Pacific region.
