Abstracts

Global Cetane Number Improver(2-EHN) Market is valued at approximately USD XX million in 2021 and is anticipated to grow with a healthy growth rate of more than 5.2% over the forecast period 2022-2028. The Cetane number is used to determine the ignition quality of diesel fuel. Diesel fuels with a high Cetane number provide a variety of engine and environmental benefits. Lower engine noise, reduced VOC emissions, lower fuel consumption, improved cold start, and more are among the benefits of Cetane number. The market growth is driven by the key factors such as high consumption of diesel fuel and Strict government regulation to control air pollution in the world. According to Statista, In the year 2020, Australia's yearly diesel fuel consumption will be 28.5 billion liters. The yearly use of diesel fuel was 29.58 billion liters in 2019. On the other hand, India's diesel consumption for 2020 is expected to be approximately 88.2 billion gallons. Due to the COVID-19 epidemic, this was a drop from the usage level of around 100 billion liters of diesel in 2019. Furthermore, increase in the technological advancements and modernization in the production techniques boost the market opportunities across the globe. However, higher prices of these chemical compounds impede the growth of the market over the forecast period of 2022-2028.
