Global Chassis Leveling Valves Market is valued at approximately USD xx million in 2020 and is anticipated to grow with a healthy growth rate of more than xx % over the forecast period 2021-2027. Chassis Leveling Valves provide suspension control, precisely modulating compressed air in the bellows that is calculated with reference to vehicle load. The valve is applicable for vehicles that are fitted with air springs, it provides surety with constant height and charging and/or venting air suspension during loading/unloading. The valves are majorly used for passenger comfort, reducing driver tiredness and provide protection to cargo. Increase in global demand of SUVs is expected to fuel the Chassis Leveling Valves Market. Changes in consumer preferences and regulatory market motivating key players for innovations is also propelling the market growth. For instance, in August 2020, WABCO launched its new Air Suspension with ECAS technology, improving fuel economy and passenger comfort. However, certain disadvantages associated with chassis leveling valves may impede market growth over the forecast period of 2021-2027.

The regional analysis of the global Chassis Leveling Valves Market is considered for the key regions such as Asia Pacific, North America, Europe, Latin America, and Rest of the World (ROW). Europe is expected to dominate the market in the forecast period benefitted by luxury vehicle brand presence in the region. OME's including Mercedes Benz, Audi, BMW, Land Rover and Porsche provide ECAS in certain models,

enhancing height raising and lowering possibilities and such benefits, fueling the market in the region. However, North America is the largest producer globally for chassis levelling valves, and is expanding economically, owing to its great employment possibilities, promising to be another leading region in the chassis leveling valves market.
