Abstracts

Global Cheese Packaging Market is valued approximately USD XX billion in 2020 and is anticipated to grow with a healthy CAGR of XX% over the forecast period 2021-2027. Cheese packaging is crucial for preserving the qualities and health benefits of cheese and preventing moisture, oxygen leakage and any sort of contamination. The major driver of cheese packaging market is increasing consumption of cheese around the world. According to United States Department of Agriculture, per capita consumption of cheese by US citizens in 2019 stood at 38.6 pounds. In the same year, Europe had the highest per capita consumption of cheese at 40.56 kg. This huge demand for cheese also boosts the demand for cheese packaging materials. Another driving factor is the rising penetration of retail distribution systems globally. As the retail shops, supermarkets, online stores, and specialty stores grow, the demand for packaged and preserved cheese also goes up. Ranging from small to large packages, cheese is more easily available and at much affordable quantities. For these reasons, there has been a huge growth in demand of cheese and, hence, demand of cheese packaging. However, the use of plastic in cheese packaging has been an environmental concern since long and it can impede the growth of market over the forecast period of 2021-2027. Nevertheless, the rising awareness against adulteration and contamination will boost the demand of cheese packaging in the forecast period.

Considering regions such as Asia Pacific, North America, Europe, Latin America, and Rest of the World, regional analysis presents that Europe is the most significant across the world in terms of market share owing to highest cheese production, rising

consumption, and cheese being a major cultural part of some European countries. However, Asia-Pacific is anticipated to exhibit the highest CAGR over the forecast period 2021-2027. Factors such as rising cheese consumption, and low cost of packaging production in India and China would create lucrative growth prospects for the Cheese Packaging Market across Asia-Pacific region.
