Abstracts

The global Chemical Logistics Market is valued at approximately USD XX billion in 2021 and is anticipated to grow with a healthy growth rate of more than XX % over the forecast period 2022-2029. The Chemical Logistics industry refers to the transportation of various products. These products require efficient care during storage and handling in order to prevent hazards like contamination, spillage, and combustion. Transportation of dangerous goods like inflammable liquids is an important part of global chemical logistics. The Chemical Logistics market is expanding because of factors such as rising chemical production and the growing need for handling and distribution of dangerous chemicals

According to Statista in 2022, the global chemical industry generated a revenue of around USD 4.73 trillion. Also in 2020, the revenue generation was around USD 3817.6 billion. With this rising growth across the chemical industry, the market is expected to grow in the forecast period. Whereas growing tech-driven logistics services and growing R&D activities by market players create lucrative opportunities for the market. However, complexities in chemical logistics hamper the market growth throughout the forecast period of 2022-2029.

The key regions considered for the Global Chemical Logistics Market study include Asia Pacific, North America, Europe, Latin America, and the Rest of the World. Asia Pacific

dominated the market in terms of revenue, owing to the emerging economies across the region, growing chemical production, and rising demand for handling and transportation of chemicals. Whereas the Asia Pacific is expected to grow with the highest CAGR during the forecast period, owing to factors such as increasing infrastructure and development of new industrial locations.

Major market players included in this report are:

Rhenus Logistics

A&R Logistics

BDP International

Agility Logistics

Al-Futtaim Logistics

DHL

FedEx

C.H. Robinson

CEVA Logistics

Petochem Middle East

Recent Developments in the Market:

In July 2021, Aegis Logistics and Royal Vopak of the Netherlands will form Aegis Vopak Terminals (AVTL), a joint venture (JV) with the goal of growing together in the LPG, chemicals storage, and handling business. The new partnership will manage a network of terminals currently located in five strategic ports along India's east and west coasts. With a total capacity of approximately 9,60,000 cubic metres, the partnership will become one of India's largest independent LPG and chemical tank storage companies. In April 2021, Sinochem and ChemChina, two Chinese state-owned firms, merged with approval from the state-owned assets supervision and administration commission (SASAC). Sasac will establish a new, unnamed entity that will be wholly owned by the Sinochem and ChemChina groups. It allows the companies to share oil trading and refining expertise in order to maximise margins in a competitive market.
