## **Abstracts**

Global Chronic Ocular Surface Pain Market is valued at approximately USD XX million in 2021 and is anticipated to grow with a healthy growth rate of more than XX% over the forecast period 2022-2028. Chronic Ocular Surface Pain is a condition that occurs due to the damage of tissue at the ocular surface or from variations to central or peripheral nerves in the ocular surface sensory pathway. The rising prevalence of bacterial and viral ocular infections, increasing geriatric populations, and growing incidences of dry eyes among people, coupled with the rise in healthcare expenditure are several factors fostering the market demand across the globe. For instance, according to the World Health Organization (WHO), the geriatric population around the world is estimated to be over 524 million in 2010, and it is projected to increase to nearly 2 billion by 2050. Consequentially, aged people are more prone to suffer from various eye disorders, which, in turn, augment the market growth across the globe. However, the shortage of skilled professionals and the unavailability of advanced healthcare facilities in developing economies impede the growth of the market over the forecast period of 2022-2028. Also, a rise in the number of research and development activities and increasing drug approvals and launches are anticipated to act as catalyzing factors for the market demand during the forecast period.

The key regions considered for the global Chronic Ocular Surface Pain Market study include Asia Pacific, North America, Europe, Latin America, and the Rest of the World.

North America is the leading region across the world in terms of market share owing to the increasing technological developments in diagnostic procedures and growing healthcare expenditure. Whereas, Asia-Pacific is anticipated to exhibit the highest CAGR over the forecast period 2022-2028. Factors such as the rising prevalence of ocular diseases, as well as, rising presence of major generic manufacturers, would create lucrative growth prospects for the Chronic Ocular Surface Pain Market across the Asia-Pacific region.
