Global Clamshell Packaging Market is valued approximately USD XX billion in 2021 and is anticipated to grow with a healthy growth rate of more than XX % over the forecast period 2022-2028. Clamshell packaging refers to packaging type in which one single container spilt into two halves. A hinge joins the two halves. This type of packaging usually consists of a variety of plastics, including PVC, polyester, and polystyrene. The hinges allow this type of packaging to open like a clamshell. Growing cosmetics and personal care industry and rising adoption of durable and appealing Packaging Solution are key drivers for the growth of Clamshell Packaging market. For instance, according to global database management company Statista- In 2021, the global functional foods and beverage market was worth USD 281.14 billion. The market is predicted to grow at a compound annual growth rate of about 9.5 percent between 2021 and 2028. For 2028, the market is forecast to be worth over USD 0.5 trillion. In recent events in November 2020 US-based sustainable technology firm Footprint has launched plant-based compostable clamshell to-go container for the food industry and in October 2021 Jamestown Plastics launched sustainable clamshell packaging named Clamtainer, the packaging uses the patented Click-It Closure technology, which offers a one-snap

closing system. Also, with growing food services industry and changing lifestyle and rapid urbanization in emerging economies, the adoption & demand for Clamshell Packaging is likely to increase the market growth during the forecast period.
