## Abstracts

Global Clinical Trial Supply and Logistics Market is valued approximately USD 13.3 billion in 2019 and is anticipated to grow with a healthy growth rate of more than 8.2% over the forecast period 2020-2026. Clinical trials are research investigations in which people volunteer to test new treatments, interventions or tests as a means to prevent, detect, treat or manage various diseases or medical conditions. The rising advancements in healthcare and medicine for testing and development of new medical procedures and drugs and experiments are likely to propel the demand of this market. Apart from this, increasing R&D expenditure in the pharmaceutical & biopharmaceutical industry and globalization of clinical trials and harmonization of regulations resulting in the outsourcing of clinical trial are the few factors responsible for growth of the market over the forecast period. For instance: as per Statista, the global spending on pharmaceutical research and development was USD \$129 billion on 2010 and has increased to USD \$182 billion in 2019. However, increasing cost of drug development and clinical trials is the major factor restraining the growth of global Clinical Trial Supply and Logistics market during the forecast period.

The regional analysis of global Clinical Trial Supply and Logistics market is considered for the key regions such as Asia Pacific, North America, Europe, Latin America and Rest of the World.
