## **Abstracts**

Global Cloud Analytics Market is valued at approximately USD 18.86 billion in 2021 and is anticipated to grow with a healthy growth rate of more than 23.0% over the forecast period 2022-2029. Cloud analytics is generally adopted to analyze data by using cloud computing. This helps in streamlining business processes through the help of various analytical tools and techniques for extracting information from massive data. Factors such as the growing adoption of cloud-based applications, increasing trend for digitalization, and a massive rise in big data, coupled with the rising data connectivity via hybrid and multi-cloud environments are driving market growth across the globe.

According to Statista, the market for cloud applications was valued at USD 133.6 billion in 2020, which is expected to grow to USD 168.6 billion by 2025. Therefore, the rising inclination towards cloud-based applications among the end-users is leveraging the market expansion into the global market. Moreover, the scarcity of in-house IT expertise

and equipment and the cost benefits of cloud-based analytics solutions are providing various growth opportunities over the forthcoming period. However, security and privacy concerns for confidential data and difficulties in running input/output-intensive applications are hindering market growth throughout the forecast period of 2022-2029.

The key regions considered for the Global Cloud Analytics Market study include Asia Pacific, North America, Europe, Latin America, and the Rest of the World. North America dominated the market in terms of revenue, owing to the increasing investments in technological advancements and the high presence of leading market vendors. Whereas, the Asia Pacific is expected to grow with the highest growth rate during the forecast period. Factors such as the rising adoption of AI and NLP technologies in various applications, the increasing number of start-up companies, as well as development of emerging economies, are burgeoning the market growth in the forecasting years.
