Abstracts

Global Cloud Professional Services Market is valued approximately USD 46.99 billion in 2019 and is anticipated to grow with a healthy growth rate of more than 19.6 % over the forecast period 2020-2027. Cloud professional services provide consulting services to customers about how to upgrade their existing business infrastructure, and their implementation services ensure a successful and safe deployment on any infrastructure, including private cloud, public cloud, and hybrid cloud. The increasing internet users, increasing demand for better time complexity, agility and portability during software development, growing need for digitization, government support and services has led the adoption of Cloud professional services across the forecast period. For instance, in October 2021, IBM announced the 'IBM Cloud Satellite,' which will allow Indian government agencies at the federal level, state level and public sector organizations, to deploy cloud services securely through public and private clouds. Also in December 2020, under the Atmanirbhar Bharat initiative, NITI Aayog has launched

DigiBoxx, India's first indigenously developed cloud storage, sharing, and collaboration platform which offers storage upto 5TB(Terabytes). However, high maintenance costs and lack of understanding may impede the growth of the market over the forecast period of 2020-2027. Also, with the increasing use of clouds in healthcare sectors and other industries' shift towards cloud because of COVID19 pandemic, the adoption & demand for cloud professional services is likely to increase the market growth during the forecast period.

The geographic analysis of the global Cloud Professional Services market includes Asia Pacific, North America, Europe, Latin America, and the Rest of the World.. Europe is the leading region across the world in terms of market share owing to the growing internet user population and promptness & affordability of Internet services coupled with the well-established digital infrastructure. Whereas, Asia-Pacific is also anticipated to exhibit highest growth rate over the forecast period 2020-2027. Factors such as rising disposable income, rising pay per view methods, increasing COVID19 cases and improving digital infrastructure would create lucrative growth prospects for the Global Cloud Professional Service market across Asia-Pacific region.
