Abstracts

Global Cloud Storage Gateways Market is valued approximately USD 4706.65 million in 2021 and is anticipated to grow with a healthy growth rate of more than 31.5% over the forecast period 2022-2029. Cloud Storage Gateway is a software or hardware networking device that provides connectivity and protocol translation services between a cloud storage service provider and local customer application. The Cloud Storage Gateways market is expanding because of factors such as increasing adoption of cloud storage and rising need for data encryption in organizations.

Cloud storage gateway is designed to provide better interoperability between different data protocols used in a server cloud architecture. Its prevalence has progressively increased during the last few decades. According to the Statista, in 2021, the global cloud applications market had a value of 133.6 billion U.S. dollars and is expected to reach 168.6 billion U.S. dollars by 2025. The cloud applications software market is anticipated to grow at a compound annual growth rate of 4.8 percent. Furthermore, in 2022, Amazon Web Services cloud infrastructure services market, accounts 32% of the total market followed by Microsoft Azure with a market share of 23%, and Google Cloud

with 10% of market share. In the fourth quarter of 2022, these three cloud vendors accounts 65 percent of total spending. Another important component driving space increase is data encryption in organizations. According to Statista in the 2022, the technology and software industry was the heaviest adopter of encryption solutions, with 72 percent of respondents indicating that their enterprise was employing an enterprise-wide encryption solution. In addition, as of 2021, The United States had the highest level of encryption adoption, with 80% of respondents in the country stating that their company used an enterprise-wide encryption strategy followed by the Netherlands and Germany, with over 70% of respondents implementing an enterprise encryption strategy. Also, increased spending on cutting-edge IT solutions and rising government initiatives in virtualization would create a lucrative growth prospectus for the market over the forecast period. However, the high cost of Cloud Storage Gateways stifles market growth throughout the forecast period of 2022-2029.

The key regions considered for the Global Cloud Storage Gateways Market study includes Asia Pacific, North America, Europe, Latin America, and Rest of the World. North America dominated the market in terms of revenue, owing to the presence of key market players and rapid technological advancement.
