Abstracts

Global CMO/CDMO Market is valued at approximately USD XX billion in 2020 and is anticipated to grow with a healthy growth rate of more than XX % over the forecast period 2021-2027. CMO/CDMO are companies that take a pre-formulated drug and manufacture it, while CDMOs are companies that do both the development and manufacturing of a drug. Rising demand for face care creams, sunscreen lotions and need for state-of-the-art processes and production technologies has led to the adoption of CMO/CDMO across the forecast period. For Instance: According to Axios, a prominent online news company in the United States, as of 2018, pharmaceutical industries in the country had the tenth-highest average after-tax profit levels, when compared to more than 100 different industries. While drug companies are responsible for 23% of the US health revenue, they also make 63% of the total profits. Also, with the growing demand for generic medicines and biologics, the adoption & demand for CMO/CDMO is likely to increase the market growth during the forecast period. However, government regulations impede the growth of the market over the forecast period of 2021-2027.

The key regions considered for the global CMO/CDMO market study include Asia Pacific, North America, Europe, Latin America and Rest of the World. Europe is the leading region across the world in terms of market share owing to the massive investments and facility expansion, mergers and acquisitions. Whereas, Asia-Pacific is also anticipated to exhibit the highest growth rate over the forecast period 2021-2027, due to presence of the major supplier of the raw materials required or the beauty and

personal care product manufacturing would create lucrative growth prospects for the CMO/CDMO market across Asia-Pacific region.
