Abstracts

Global Cocktail Syrups Market is valued approximately USD 4.3 billion in 2020 and is anticipated to grow with a healthy growth rate of more than 4.5% over the forecast period 2021-2027.

Cocktail Syrups is a condiment which is manufactured by stirring grainy sugar into hot water until the sugar is melted and then freezing the by-product. The final product is a viscous liquid which is used as a sweetening agent in the cocktails. The rise of pubs and bars across cities, young population engaging in party culture in metros and tier-1 cities, and new fusion of flavors like ginger-lemon, mint-cola etc. are some factors driving the sales of Cocktail Syrups. With health-conscious Gen Z population entering the legal alcohol drinking age, the companies are forced to bring innovation by reducing artificial coloring, sweetening agents and by using natural ingredients in syrups. According to WHO's Global Health Observatory, the total per capita alcohol consumption in India is expected to increase to 7.9 liters in 2025 from current 6.6% liters 2020. Similarly, the figure for United states is 10.3L from 10.1 L, 11.5L to 11.8L for UK and 8.1L from 7.5 for China in period 2020-2025. The increase in the alcohol consumption indicates the increase in demand for cocktail syrups. Cocktail Syrup companies can also utilize the situation by targeting new entrants in drinking and make them habitual of cocktails instead of hard alcohol and liquors. The perception of cocktail syrups among fitness enthusiasts being unhealthy due to artificial sweetening may act as a restraint, but increasing consumers from millennials and Gen-Z group demanding organic and herbal variants acts as an opportunity for Cocktail Syrups in next decade.

Key regions such as Asia Pacific, North America, Europe, Latin America and Rest of the World are analysed to provide a holistic picture of Cocktail Syrups Market. North America is the significant region across the world in terms of market share due to high share of population engaged in drinking, higher per capita income and well-established cocktail appetite among drinkers,. Whereas, Asia-Pacific is anticipated to exhibit highest growth rate for the forecast period 2020-2027 owing to the growing inclination towards partying culture, growth of bars and pubs in tier-2 cities and rising disposable income.
