Global Cocoa Market is valued approximately USD XX billion in 2020 and is anticipated to grow with a healthy growth rate of more than 3.24 % over the forecast period 2021-2027. Cocoa beans are derived from the Theobroma cocoa plant. Cocoa is fully dried and fermented beans that are further processed before being utilized. The rising global demand for dark and premium chocolates is primarily driving cocoa industry growth. Dark and quality chocolates are becoming increasingly popular due to the numerous health advantages they provide, including reduced hypertension, a decreased risk of cardiovascular disease, and chronic fatigue syndrome which is driving the market growth during the forecasted period. Cocoa is also a rich antioxidant source, fueling the cocoa market's expansion. According to the report of International Institute for Sustainable Development (IISD), from 2019 to 2025, the worldwide cocoa bean market is anticipated to expand at a compound annual growth rate (CAGR) of 7.3%, reaching USD 16.32 billion. The chocolate business used 43% of all cocoa in 2017, with a retail market value of USD 106.19 billion in 2017 and is anticipated to increase to USD 189.89 billion by 2026. However, farmers' lack of understanding regarding new farming practices and the fluctuating price of cocoa as a result of inclement weather and political unrest hampers the growth of the market over the forecast period of 2021-2027. Also, growing demand for cocoa beans from the pharmaceutical industry and increased usage of cocoa in the production of healthy beverages is likely to increase the market growth during the forecast period.

The key regions for the geographical study of the global cocoa market are Asia Pacific, North America, Europe, Latin America, and the Rest of the World. Europe is the significant region across the world in terms of market share owing to the growing demand for premium quality chocolates and food products, increasing usage of cocoa in skin care and pharmaceutical industry and growing consumer awareness regarding the health benefits of cocoa. Whereas, Asia-Pacific is also anticipated to exhibit the highest CAGR over the forecast period 2021-2027. Factors such as rising disposable income, rapid urbanization and high demand and supply of cocoa based products would create lucrative growth prospects for the Cocoa market across Asia-Pacific region.
