Abstracts

Global Coffee Grounds Market is valued at approximately USDXX million in 2021 and is anticipated to grow with a healthy growth rate of more than XX% over the forecast period 2022-2028. Coffee grounds refer to a dreg a form of solid particles that remain after brewing the coffee. These are formed by roasting beans and/or obtained from the instant coffee manufacturing process. Coffee grounds are chiefly adapted to nourish gardens, remove fleas from pets, repel pests and insects, and neutralize odors. The increasing inclination toward the adoption of natural and organic products, the rising use of coffee grounds in cosmetic products such as soaps and lotions, coupled with the strategic actions by the key market players are the key factors propelling the market demand across the globe. For instance, in 2017, the market size of the Indian cosmetics industry was recorded at USD 11.16 billion, and the market is constantly developing and is projected to reach approximately USD 20 billion by 2025. Thereby, the flourishing growth of the cosmetics sector is likely to fuel the demand for natural and organic cosmetics products, which, in turn, augment the market growth in the near future. However, several problems associated with coffee grounds impede the growth of the market over the forecast period of 2022-2028. Also, increasing availability through online retailers and the rising influence of social media to promote the benefits of coffee grounds are anticipated to act as catalyzing factors for the market demand during the forecast period.

The key regions considered for the global Coffee Grounds Market study include Asia Pacific, North America, Europe, Latin America, and the Rest of the World. North America is the leading region across the world in terms of market share owing to the surging demand for natural & organic products and high presence of several leading market players. Whereas, Asia-Pacific is anticipated to exhibit the highest CAGR over the forecast period 2022-2028. Factors such as the increasing disposable income, as well as rising adoption of coffee grounds as insecticides, would create lucrative growth prospects for the Coffee Grounds Market across the Asia-Pacific region.
