## **Abstracts**

Global Cognitive Electronic Warfare System Market is valued at approximately USD 18.53 billion in 2023 and is anticipated to grow with a healthy growth rate of more than 14.41% over the forecast period 2024-2032. Cognitive Electronic Warfare System is an advanced electronic warfare system that employs cognitive or artificial intelligence techniques to enhance its capabilities. These warfare systems were integrated with advanced signal processing techniques, machine learning algorithms, and decision-making capabilities to analyze vast amounts of data and make informed decisions rapidly. The rising focus on software-defined systems is gaining attention in the Global Cognitive Electronic Warfare System Market. Software-defined systems facilitate interoperability and seamless integration with other electronic warfare assets and military systems. These architectures allow for standardized interfaces and protocols, enabling easier integration with existing infrastructure and future systems.

The Global Cognitive Electronic Warfare System Market is driven by the rise in territorial conflicts & geopolitical instabilities and increasing demand for artificial intelligence (AI)-enabled warfare system across the world. Geopolitical tensions and uncertainties lead nations to bolster their defense capabilities, including electronic warfare systems, as a means of safeguarding their sovereignty and interests. The unpredictability of global politics drive defense spending and investments in advanced electronic warfare technologies to maintain military readiness and strategic deterrence. In addition, artificial intelligence enables these systems to adapt in real-time to dynamic threats, improve situational awareness, and optimize response strategies, thus enhancing

overall military effectiveness However, the high cost of cognitive electronic warfare System and vulnerability towards potential cyber threats is going to impede the overall demand for the market during the forecast period 2024-2032.

The key regions considered for the Global Cognitive Electronic Warfare System market study includes Asia Pacific, North America, Europe, Latin America, and Rest of the World. In 2023, North America was the largest regional market in terms of revenue owing to factors such as the rising number of military modernization projects across the region.
