Abstracts

Global Cold Agglutinin Disease Market is valued at approximately USD XX million in 2021 and is anticipated to grow with a healthy growth rate of more than XX% over the forecast period 2022-2028. Cold agglutinin disease (CAD) is a variety of autoimmune hemolytic anemia (AIHA). In this condition, the individual's immune system attacks and destroys their own red blood cells (RBCs) because of the higher exposure to cold temperatures. The increasing number of geriatric people, rising incidences of cold agglutinin disease, and growing healthcare expenditure are major factors fueling the market demand across the globe. For instance, according to the Department of Economic and Social Affairs, in 2019, the world's population of people aged 65 and up totaled 703 million. Also, the number of elderly people is expected to increase to 1.5 billion by 2050. Accordingly, the increasing number of aged people are more likely to suffer from Cold Agglutinin Disease, which, in turn, bolsters the growth of the global market. However, the shortage of skilled professionals and lack of healthcare infrastructure in emerging regions impede the growth of the market over the forecast period of 2022-2028. Also, an increase in the number of drug approvals and launches and growing investment in the development of advanced technologies are anticipated to act as catalyzing factors for the market demand during the forecast period.

The key regions considered for the global Cold Agglutinin Disease Market study include Asia Pacific, North America, Europe, Latin America, and the Rest of the World. North

America is the leading region across the world in terms of market share owing to the increasing healthcare expenditure, the presence of various prominent market players, and growing investment in R&D activities. Whereas, Asia-Pacific is anticipated to exhibit the highest CAGR over the forecast period 2022-2028. Factors such as the increasing patient pool, as well as availability of better healthcare facilities, would create lucrative growth prospects for the Cold Agglutinin Disease Market across the Asia-Pacific region.
