Abstracts

Global Cold Chain Market is valued approximately at USD 210.49 Billion in 2020 and is anticipated to grow with a healthy growth rate of more than 14.8% over the forecast period 2021-2027. Cold chain is a combination of temperature-controlled surface transport and supply chain. It provides freezing solutions to maintain the quality and shelf life of the products, such as fresh agricultural produce, seafood, photographic film, frozen food, chemicals, and pharmaceutical drugs. Increase in refrigerated warehouses, growth in pharmaceutical sector and favorable government initiatives are driving the growth of cold chain market. For instance, according to India Brand Equity Foundation (IBEF) report of 2020, in September 2020, the Ministry of Food Processing Industries (India) approved 28 new cold chain infrastructure projects under the 'Pradhan Mantri Kisan SAMPADA Yojana' (PMKSY), to reduce food waste and boost the export potential of the local agri-food sector by providing Rs. 2.08 billion (US\$ 28 million) aid from the central government. Furthermore, rising demand for perishable goods associated with e-commerce based food and delivery market is expected to drive the market positively in future. However, high operational cost of cold chains may hamper the growth during forecast period.

Asia Pacific, North America, Europe, Latin America, and Rest of the World are considered for the regional analysis of the global Cold Chain Market. Europe is dominating across the world among above mentioned regions in terms of market share due to rising demand for the cold chain owing to a continuous in domestic consumption of perishable goods. Whereas Asia Pacific is anticipated to exhibit the highest CAGR over the forecast period 2021-2027 due to penetration of warehouse management systems and increasing government investments for logistics infrastructure development.
