## **Abstracts**

Global Cold Rolled Aluminum Coil Market is valued approximately USD XXX million in 2019 and is anticipated to grow with a healthy growth rate of more than XX % over the forecast period 2020-2026. Cold Rolled Aluminum Coils are produced by processing the aluminum metal through the cold rolling process. The process involves rolling the metal at a temperature low enough for strain-hardening to occur. Although the process is named Cold Rolling, the metal in the process is heated up to deformation to approximately 100 degree Celsius and a large amount of coolant is used throughout the process to maintain thermal equilibrium. The process is mainly carried out to obtain strips and aluminum sheets of the required final gauge and enhanced physical properties such as corrosion resistance, weldability, and medium strength. These coils are mainly used to make airplane oil tanks, oil pipes, transportation vehicles, ships and Food and Packaging industry. The significant growth in these end-use industries drives the market for Cold Rolled Aluminum coils during the forecast period. Further, the rise in production of aluminum from different sources including Primary and secondary has led the manufacture of Cold Rolled Aluminum Coil across the forecast period. As per the U.S. Geological Survey, the production of aluminum from the primary source increased from 741 thousand metric tons in 2017 to 890 thousand metric tons in 2018. While the

production from Secondary sources (from old scrap) increased from to 1590 thousand metric tons in 2017 to 1600 thousand metric tons in 2018. With the increasing production of aluminum, the demand for cold rolled aluminum coils increases.

The regional analysis of global Cold Rolled Aluminum Coil market is considered for the key regions such as Asia Pacific, North America, Europe, Latin America and Rest of the World. Asia-Pacific is the leading/significant region across the world in terms of market share owing to the largest production of aluminum in the region. As per the USGS, China produced 33 million metric tons of aluminum in 2018 while India produced 3.7 million tons in the same year. This makes the material widely available in the region at lower costs aiding the market for Cold Rolled Aluminum Coils. Whereas, Asia-Pacific is also anticipated to exhibit highest growth rate / CAGR over the forecast period 2020-2026. Factors such as increasing industrialization along with the rising use of these aluminum coils in multiple end-user industries would create lucrative growth prospects for the Cold Rolled Aluminum Coil market across Asia-Pacific region.
