## **Abstracts**

Global Cold Rolling Oils/Lubricants Market is valued approximately USD XX billion in 2021 and is anticipated to grow with a healthy growth rate of more than XX % over the forecast period 2022-2028 . Cold rolling Oil is obtained by blending fully synthetic and natural products with advanced emulsifiers. Surface finish and roll life depend on the lubrication at the roll and steel sheet interface. It is a soluble oil for steel and other ferrous alloys. It is used in the form of emulsion to effectively reduce different types of steel to the gauge and shape required. Growing production of aluminum & steel and rising automotive sector are key drivers for the growth of Cold Rolling Oils/Lubricants market. For instance, according to The World Steel Association (worldsteel)- world crude steel production in the year 2020 was estimated at 1878 million tonnes, witnessed an increase of over 4 million tonnes as compared to 1874 million tonnes in the year 2019. Also, with the rising metal processing industries and growing industrialization, the adoption & demand for Cold Rolling Oils/Lubricants is likely to increase the market growth during the forecast period. However, volatile cost of raw material impedes the growth of the market over the forecast period of 2022-2028 .
