Abstracts

Global Cold storage Market is valued approximately USD 107.18billion in 2020 and is anticipated to grow with a healthy growth rate of more than 13.5% over the forecast period 2021-2027. Cold storage is a storage storing goods in an environment below the outdoor temperature for preservation. Low-carbon design, environmental auditing, crafty construction of cold storage, and increasing IT spending in cold storage logistics are factors contributing to the growth of the market. For instance: as per the Statista in 2018, spending on cold chain logistics, transport and packaging in North America amounted to 3.7 billion U.S. dollars. However, high initial investment and lack of infrastructure impedes the growth of the market over the forecast period of 2021-2027. Also, with the expansion of food retail chains, will provide new opportunities for the market growth over the forecast period.

The global Cold storage market is considered for the regions such as Asia Pacific, North America, Europe, Latin America and Rest of the World. Europe is a significant region across the world in terms of market share owing to adoption of technological advancement, adoption of agricultural farming and presence of food warehousing facilities. Whereas, Asia-Pacific is also anticipated to exhibit the highest growth rate over the forecast period 2021-2027. Factors such as rising need of high yield of crop and need to preserve them for longer time create growth prospects for the Cold storage market across Asia-Pacific region.
