Abstracts

Global Collapsible Water Bottle Market is valued at approximately USD 1781.5 million in 2021 and is anticipated to grow with a healthy growth rate of more than 6.5% over the forecast period 2022-2029. Collapsible water bottles are a bottle type that is used for water storage and can be carried by folding when empty, which is the best alternative for travelers, athletes, office or on-site workers, and many others. The market is chiefly driven by factors including growing awareness regarding environmental hazards and the increasing number of working professionals.

The rise in per capita disposable income of the population is increasing their purchasing capacity. According to the Federal Statistical Office, in 2019, disposable personal income in Germany accounted for USD 516.23 billion, and the amount increased and reach USD 544.47 billion in 2022. Therefore, the rising inclination towards lightweight bottles that need a little space compared to other regular bottles is accelerating the market growth. In addition, the rising initiatives by the key market players, as well as the development of emerging markets are presenting various growth prospects in the forthcoming years. However, the imposition of strict regulations by various governments and some hazardous effects associated with the usage of plastic are hindering market growth throughout the forecast period of 2022-2029.

The key regions considered for the Global Collapsible Water Bottle Market study include Asia Pacific, North America, Europe, Latin America, and the Rest of the World. Europe dominated the market in terms of revenue, owing to the presence of a huge consumer base and the availability of products on e-commerce platforms. Whereas, North

America is expected to grow at a substantial rate during the forecast period. Factors such as growing demands for more sustainable alternatives, as well as increasing product development with the incorporation of technological innovation and customization, are burgeoning the market growth in the forecasting years.

Major market players included in this report are:

Vapur Inc.

Hydrapak LLC

inov-8

Salomon SAS

Ultimate Direction Inc.

Lingxu International Trade Co. Ltd.

Qimei Packaging Co., Ltd.

T&T Plastic Hardware (Zhuhai) Co., Ltd.

4MO Plastic Co. Ltd. (Zhuhai)

Reshine Imp. & Exp. Co. Ltd.

Recent Developments in the Market:

In September 2021, Vapur Inc. announced the introduction of its latest bottles that are designed to fold, are very lightweight, and be collapsible. The product is manufactured by the usage of three layers of BPA-free, ultra-durable plastic.

In October 2021, Hydrapak LLC unveils the company's new product Flux™ 1 L Collapsible Water Bottles, which is compressed like a soft flask, shaped like a rigid bottle, and saves 60 percent of its weight, with a spill-proof twist cap for on-the-go hydration.
