Global Colorimeter Market is valued approximately USD XX million in 2021 and is anticipated to grow with a healthy growth rate of more than XX % over the forecast period 2022-2028. Colorimeter is a device which is used to measure any coloured compound's concentration. This device compares the amount of light getting through a solution with the amount that can get through a sample of pure solvent. Colorimeter has applications in colour printing, textile manufacturing, paint manufacturing and food industries among others. Rising Food and beverages industry and growing water utilities industries are key drivers for growth of Colorimeter Market. For instance, according to Statista - In 2021, the global functional foods and beverage market was valued at USD 281.14 billion, and the market is projected to reach to USD 500 billion by 2028. Also, growing industrialization and urbanization in emerging markets and increasing applications of colorimeters in end use industries are anticipated to act as a catalyzing factor for the market demand during the forecast period. However, lack of penetration from emerging economies and high cost associated with colorimeter devices impede the growth of the market over the forecast period of 2022-2028.

The key regions considered for the global Colorimeter Market study include Asia Pacific,

North America, Europe, Latin America, and the Rest of the World. North America is the leading region across the world in terms of market share owing to presence of leading market players and rising digitization across different industries in the region.
