Abstracts

Global Commercial Airport Lighting Market is valued at approximately USD XX billion in 2021 and is anticipated to grow with a healthy growth rate of more than 4.00 % over the forecast period 2022-2028. Commercial Airport Lighting includes all types of lighting systems used in any type of airport in order to support commercial aircraft operations. It facilitates night flying of aircraft and improves airport appearance. The construction of new airports and growing government initiatives to support aviation has led to the adoption of Commercial Airport Lighting across the forecast period. For Instance: as of July 2021, the Rajiv Gandhi International Airport at Hyderabad completed the conversion of 98% of its Airside lighting. China plans to open over 30 new civil airports and is targeting a 43% increase in civil aviation capacity under the 14th Five-Year Plan (2021-25). Also, with the increased implementation of efficient led-based airfield lighting and increasing investment in infrastructure, and the entry of private players, the adoption & demand for Commercial Airport Lighting is likely to increase the market growth during the forecast period. However, high manufacturing costs impede the growth of the market over the forecast period of 2022-2028.

The key regions considered for the Global Commercial Airport Lighting Market study include Asia Pacific, North America, Europe, Latin America and Rest of the World. North America is the leading region across the world in terms of market share owing to the developed airplane infrastructure and rising adoption of tourism. Whereas, Asia-Pacific
