Abstracts

Global Commercial Refrigeration Compressors Market is valued at approximately USD XX billion in 2021 and is anticipated to grow with a healthy growth rate of more than XX % over the forecast period 2022-2028. Commercial refrigeration refers to the cold storage equipment used in commercial settings. Examples include the reach-in refrigerators and freezers found in supermarkets, specialty food stores, convenience stores and grocery stores. The rising food export is boosting refrigeration compressor sales and expansion of retail industry sectors has led to the adoption of Commercial Refrigeration Compressors across the forecast period. For Instance: The Food Safety and Standards Authority of India (FSSAI) plans to invest around Rs 482 crore (US\$ 72.3 million) to strengthen the food testing infrastructure in India, by upgrading 59 existing food testing laboratories and setting up 62 new mobile testing labs across the country. Also, with the growing popularity of walk-in refrigeration solutions, the adoption & demand for Commercial Refrigeration Compressors is likely to increase the market growth during the forecast period. However, high manufacturing costs impede the growth of the market over the forecast period of 2022-2028.

The key regions considered for the global Commercial Refrigeration Compressors market study include Asia Pacific, North America, Europe, Latin America and Rest of the World. Europe is the leading region across the world in terms of market share owing to the increasing adoption of commercial refrigeration compressors to preserve food and other sensitive products across various industries. Whereas, Asia-Pacific is also anticipated to exhibit the highest growth rate over the forecast period 2022-2028.

Factors such as increasing population, increasing need for advanced food storage, and the expansion of the commercial sector would create lucrative growth prospects for the Commercial Refrigeration Compressors market across Asia-Pacific region.
