Abstracts

Global Commodity Trade Finance Market is valued approximately USD XX billion in 2021 and is anticipated to grow with a healthy growth rate of more than XX% over the forecast period 2022-2029. Commodity Trade Finance refers to funding of trade of commodities such as heavy metals, crude oil etc. Commodity trading involves different types of contracts that derive their value from the underlying commodity. The rising expansion of BFSI sector and increasing growth of commodities trade in post covid era are key factors accelerating the market growth over the forecast period.

According to Statista- as of 2022, the revenue in the global Banking, Finance & Insurances is estimated at USD 3720 billion, and the market is projected to grow at CAGR of 2.47% between 2022 and 2025 to reach to USD 4002.52 billion by 2025. Also, rising digitization in banking and finance sector and favorable initiatives from government authorities would create lucrative growth prospective for the market during the forecast period. However, lack of focus on MSMEs and insufficient risk valuation capabilities impede the market growth throughout the forecast period of 2022-2029.
