Global Compact Road Sweepers Market is valued approximately USD XX million in 2021 and is anticipated to grow with a healthy growth rate of more than XX % over the forecast period 2022-2028. Road sweepers or sometime also known as road cleaner refers to cleaning machines to clean streets and localities in cities. These machines work on the principle of 'Vacuum Suction'. Sweepers are equipped with central brush that transfers the waste towards the suction nozzle, and this waste is collected in a tank. Growing Waste management industry and increasing construction of smart cities as well as recent Collaboration activities & product innovations by leading market players are key factors driving the growth of Compact Road Sweepers market. For instance, according to Statista – in 2020, the global market for waste management was estimated at USD 1.61 trillion, and as per projections the market would increase to USD 2.5 trillion by 2030. Furthermore, in September 2021, Fayat Environmental Solutions (FES) entered in a distribution agreement with Norway based Sandhaug. Under this agreement, Sandhaug would be appointed as lead distributor for Mathieu sub-compact and compact, Ravo mid-size and Scarab truck-mounted sweepers in the country. Moreover, in December 2021, UK based Dawsongroup Sweepers launched its new range of zero emission electric road sweeper. Also, growing urbanization in emerging

markets and increasing prevalence of pollution related diseases are anticipated to act as a catalyzing factor for the market demand during the forecast period. However, high costs associated with compact road sweeper impede the growth of the market over the forecast period of 2022-2028.

The key regions considered for the global Compact Road Sweepers Market study include Asia Pacific, North America, Europe, Latin America, and the Rest of the World. North America is the leading region across the world in terms of market share owing to presence of leading market players and growing commercial construction in the region. Whereas, Asia Pacific is anticipated to exhibit a significant growth rate over the forecast period 2022-2028. Factors such as rising construction of smart cities, and increasing investment on waste management in the region, would create lucrative growth prospects for the Compact Road Sweepers Market across the Asia Pacific region.
