## **Abstracts**

Global Concrete Admixtures Market is valued approximately USD 14.12 billion in 2019 and is anticipated to grow with a healthy growth rate of more than 9.13% over the forecast period 2020-2026. The market growth is primarily driven by rising construction of residential and commercial buildings across various regions of the world. Additionally, rising demand for roads, bridges and high-rise buildings are some other factors which are fueling the growth of the market. However, lack of knowledge about admixtures and surge in raw material prices are expected to hamper the market growth. Growth in the industry is backed by increased investment in the infrastructure market. Government investment in airport expansion would likely boost demand for concrete admixtures. As of January 2015, global airport construction investment stood at nearly USD 540 billion. The growing urbanization is putting pressure on the existing facilities at the airports. Significant development in the global construction and mining industries along with industrial developments in Asia Pacific and Latin America's emerging economies will play major roles in the growth of the industry in the coming years. In addition to water, Portland cement and aggregate, these admixtures are added to the concrete blend immediately before or during mixing.

The regional analysis of Concrete Admixtures market is considered for the key regions such as Asia Pacific, North America, Europe, Latin America and Rest of the World. Over the coming years, the Asia Pacific region is projected to see significant growth rate in the Concrete Admixtures market owing to the rapid urbanization along with rising private

as well as public investment towards the development of infrastructure in the region.
